Caterpillars - Reception

Our 'Intrepid Explorers' topic this term has proved to be an exciting and engaging learning journey for the children in Reception. We have enjoyed taking part in a variety of activities and have particularly enjoyed exploring the newly revamped outdoor classroom and resources shed which was tidied up, and the shed painted by some kind volunteers from the PTA. The children have also had the opportunity to try different foods from around the world, hunt for dinosaurs, carry out experiments, research their favourite animals and try out their map reading skills amongst a myriad of other learning experiences. The term has come to a pleasant end in this final week where we have welcomed in parents for a stay and play session and enjoyed an amazing trip to the Forest School-next term certainly has a lot to live up to!

Butterflies- Year 1 and 2

During Term 4, Class 1's topic will be 'It's a Bug's Life'. The children will be visiting Forest School for a day of fun, outdoor learning on the 21st February which will be an excellent start to this topic. Throughout the term the foundation subjects will be taught through the 'Bug's Life' theme. In Science the objectives covered will be from 'Living things and their habitats' which will fit in perfectly with the topic too.

We are looking forward to the new term and all the fun learning opportunities.

Dolphins- Year 3 and 4

Next term will see Class 2 on a journey of discovery about the Romans in Britain. A trip to the Roman Museum in Canterbury will enhance their knowledge of life in Roman times and provide them with some hands-on opportunities to be an archaeologist. In Science the children will be covering the theme of sound including how we hear sound and investigating ways to muffle sound.

It certainly is going to be a wonderful term.

Eagles- Year 5 and 6

In term 4 Eagles class will be attempting time travel! Our budding time lords will be investigating: British Kings and Queens; the history of medicine and crime and punishment through the ages. Our English work will link to this topic as we explore balanced arguments as well as poetry in the past. In Maths we will be continuing our work on fractions and solving problems involving time and timetables. In Science we will be discovering the world of micro-organisms!
